

MISS MUSTARD SEED'S® MilkGrip™ Indoor/Bonding Agent

INGREDIENTS

Acrylic Emulsion, Water

HOW TO STORE IT

Wipe lip with warm wet cloth to prevent the product from sealing the lid to the container. Keep from freezing. Keep container tightly closed and store in a cool, dry and well-ventilated place. Shake well before use.

HOW TO USE IT

Shake well before using. For optimum adhesion, clean the surface to be painted with T.S.P. and sand lightly to roughen the surface. Always test adhesion before applying to a large area.

To use with Milk Paint: Mix one part of bonding agent to two parts of milk paint already mixed. For an even stronger grip, mix in equal parts. Mix the bonding agent with all coats of paint for optimum adhesion.

To use as a primer for water-based paints: Apply a thin layer of bonding agent with a paint brush or roller. Let dry for 2 hours before applying paint.

KEY FEATURES

- Low Odor
- Low VOCs
- Non-Toxic
- Environmentally Friendly
- When added to mixed MilkPaint™, promotes slick surface adhesion (glass, metal, etc.)
- 1 part MilkGrip™ Indoor/Bonding Agent to 4 parts MilkPaint™.
- Only required in the first coat of MilkPaint™.
- Dries in 24 hrs.

ADDITIONAL TIPS

- MilkGrip™ Indoor/Bonding Agent will not adhere to surfaces that are oily, greasy, or dirty. Clean with TSP or degreaser prior to painting. Rinse well.
- While sanding isn't necessary, we recommend a light sand on extremely shiny surfaces.
- MilkGrip™ Indoor/Bonding Agent is not needed when painting raw wood or porous surfaces.
- MilkGrip™ Indoor/Bonding Agent is not intended for outdoor use, instead use MilkGrip™ Outdoor/Preservation Additive.
